

SIM Surgical is a growing medical device manufacturer that has an immediate need for a focused and diligent Quality Control Inspector. This is an introductory position requiring 1-2 years of relevant experience. We are especially seeking candidates with machining backgrounds or current technical college students looking to expand their capabilities.

The candidate must be able to complete the following functions at a minimum:

- Perform first articles, in-process, and final inspection on precision machined products using a wide variety of inspection tools
- Able to read and interpret prints

Familiar with standard measurement tools: Micrometers, Calipers, Comparators, and, thread and plug gages

- Must be detail oriented in documentation as well as with measuring techniques
- Must have high visual acuity

The candidate should have the following skills:

- Must be able to perform job functions given distractions
- Driven to be efficient
- Dedication to performing the jobs in a high paced environment
- Self-motivated; able to work with minimal supervision
- Ability to read and understand standard operating procedures, specifications and forms
- Highly trainable
- Strong attendance record
- Familiar with Microsoft applications (Excel, Outlook)
- Have a background in a machining environment (Quality and/or Production)

This job posting is for 1st and weekend shift.
